Office Action Summary

Art Unit: 3739

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15 ad 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 is indefinite because it depends from itself. For the purposes of examination the claim will be treated as depending from claim 14. Claim 25 is indefinite because how the “amplifying and diffusing” of the pulses occurs is unclear.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Murphy.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Murphy in view of the Tens-Cam device. Murphy teaches a device such as claimed except the particular frequencies and the mention of a specific power supply. The Tens-Cam teaches the particular frequencies, power supplies, and treatment times and distances claimed. It would have been obvious to use the Tens Cam as the radiation source of Murphy, since Murphy teaches that any suitable source may be used, thus producing a device such as claimed.

Claims 17-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Murphy in combination with Tens Cam. The teachings of Murphy and Tens Cam and the motivations for

Art Unit: 3739

combination thereof are essentially those already set forth above. Thus it would have been obvious to the artisan of ordinary skill to combine these old and well known teachings to produce a method such as claimed.

It is noted that applicant discusses the sale and use of Tens Cam devices in the paragraph bridging pages 1 and 2 of the instant disclosure. It is further noted that the publication concerning the Tens Cam filed with the Information Disclosure Statement filed February 27, 2003 is marked "REVISION" 9/15/01". The examiner requests applicant to furnish the earliest date that the Tens Cam was offered for sale; the earliest date of the use of Tens Cam; and copies of any and all publications that REVISION 9/15/01 is a revision of or any other publication describing the Tens Cam and their publication dates.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Talass teaches that glass is silicon dioxide.
